DETAILED ACTION

Response to Amendment

This office action is in response to amendment filed on 10/1/2007. Of the previously presented claims 1-5, 7-15, 17, and 18, claims 1, 4, 5, 11-15, 17, and 18 have been cancelled and claims 19-22 have been added.

Allowable Subject Matter

1. Claims 2, 3, 7-10, and 19-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The invention of the present application pertains to a mobile terminal with a personal authentication function and a mobile terminal system which prevents unauthorized use of the mobile terminal by an unauthorized person when the mobile terminal is lost or stolen. An object of the invention is to prevent unauthorized use of the mobile terminal even if the owner is not aware that the terminal has been lost or stolen.

With respect to the claimed invention, independent claim 7 recites a mobile terminal system for communication with a base station. The mobile terminal comprises a personal authentication information storing section for storing personal authentication information, an identity information inputting section for inputting identity information of a current user of the mobile terminal, a personal authentication section that authenticates a user by checking whether the inputted identity information matches with the personal

authentication information, and an informing section that transmits an authentication result to the base station if the authentication fails. The base station comprises an owner information storing section which stores a name and a wire phone number for the owner of the mobile terminal and an owner-addressed authentication result informing section that transmits the authentication failure result to the owner based on the stored owner information. The novelty of the claimed invention lies in the combination of all the limitations recited and the operation of the components of the system to prevent an unauthorized user to access the mobile terminal as well as informing the owner of the mobile terminal that an unsuccessful authorization attempt has occurred.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Helle (US 6,662,023) – Helle discloses a method and apparatus for controlling and securing mobile phones that are lost, stolen, or misused (title). Helle teaches that an owner of mobile phone owner may remotely control the phone when it has been lost or stolen via a Short Messaging System (SMS) (abstract). In the scope of the invention, the owner may send a SMS control message to lock the phone and display instructions

along with a phone number to contact the owner (figures 3-6). However, Helle differs from the present application in that an authentication failure is not sent to a base station and forwarded to the owner of the phone via a wire line.

Park (US 5,862,472) – Park discloses a circuit for indicating loss of a portable telephone and control method thereof (title). Park teaches if a call threshold is surpassed, an audible alarm is generated and the present user is authenticated by means of entering a password. If the entered password does not match the password stored in memory, then a loss mode is activated. In the loss mode the owner's telephone number is automatically dialed when any attempt to make a call is made. In Park the phone is restricted to only call the number of the owner which is stored in memory and differs from the means and operation of informing the owner that an authentication failure has occurred of the present application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NAM HUYNH whose telephone number is (571)272-5970. The examiner can normally be reached on 8 a.m.-5 p.m..
